A Selected Bibliography of American Jewish History

By JACOB RADER MARCUS*

FOREWORD

This bibliography is brief and necessarily subjective. There are literally many hundreds of books, essays, and articles which might have been included. Purely for reasons of expediency and convenience, this bibliography has been limited to English-language books alone—though there are useful works in other languages and many excellent articles tucked away in the periodical literature. The term "history" in the title has been interpreted rather broadly, and thus one may find many books included which deal with social, economic, cultural, and religious themes. No attempt has been made to include a single volume of the large literature touching on the Jew published prior to 1850. Students who seek light in this field can, of course, always refer back to A. S. W. Rosenbach, An American Jewish Bibliography . . . until 1850 (New York: Publications of the American Jewish Historical Society, Number 30, 1926). The compiler has not ventured to list all congregational histories. Their number is legion, and their quality sometimes questionable.

Departing from the procedure that he employed in the third edition of this bibliography published in 1954, the compiler has included in this new edition a number of works describing national institutions as well as most of the town, city, and state histories. Nevertheless, readers should be alerted to the fact that many of the works mentioned in this bibliography are no longer in print. Most of them, in all likelihood, are available on an inter-library loan basis from larger Jewish libraries in New York City, Washington (Library of Congress), and Cincinnati (Hebrew Union College Library). Although this new edition has been completely revised

^{*} Professor Marcus is the Director of the American Jewish Archives, Cincinnati, Ohio, and a former President of the American Jewish Historical Society. This bibliography, which appeared originally in the Jewish Book Annual, 1943-1944, was reprinted in a revised form in 1949, and again in 1954. This fourth edition has been brought up-to-date and substantially enlarged.

and substantially enlarged, biographies and autobiographies are still omitted, as are all studies in German, Hebrew, and Yiddish. Those who are fortunate enough to read Yiddish will find it valuable to consult monographs in that language dealing with the *landsmanshaften*, special fraternal orders, the Yiddish theater and press, and, of course, the Jewish labor movement.

The compiler has not undertaken to evaluate each work critically. That would have been an ungrateful task. Unfortunately, too many of the works dealing with our subject are altogether inadequate. Very few measure up to the canons of historic objectivity and the scientific method. Nevertheless, certain books are listed on the ground—always denied by the "critics"—that a poor book is frequently better than no book! There is this consolation: better books are being written every day. Some day—it will come sooner than we think—we shall really be in a position to offer a bibliography of sound, scientific works on the life and the history of the American Jew. Speed the day!
